

## Gresham International Foundation: Using Crypto for Good

At **Gresham International Foundation**, we believe in the transformative power of cryptocurrency and blockchain to create a better world. Our mission is built upon three core pillars: **Advocate, Educate, and Innovate**. Through these, we strive to make the crypto space more inclusive, accessible, and secure for everyone.

 **Advocate** - We stand with those who have been targeted by online scams, cyberbullying, and harassment, offering support and resources to protect and empower them.

 **Educate** - We provide accessible education to help individuals enter and thrive in the crypto industry, ensuring they have the knowledge and tools to navigate the space safely and successfully.

 **Innovate** - We support startups founded by underrepresented minorities through grants and mentorship, fostering diversity and innovation in the blockchain ecosystem.

We welcome **all donations**—whether in crypto or traditional currencies—to help us continue our mission of **using crypto for good**. Every contribution helps create opportunities, protect individuals, and push the industry toward a brighter, more inclusive future.

Join us in making a difference. **Together, we can shape the future of crypto for everyone.**
